# AUTHOR INDEX

**Aaberge, R.**
Doksum, D.A., Fenstad, G., ---- (1977) Plots and tests for symmetry. **64**, 473-487

**Abakuks, A.**
---- (1974) A note on supercritical carrier-borne epidemics. **61**, 271-275

**Abbott, R.D.**
Carroll, R.J., Spiegelman, C.H., Lan, K.K.G., Bailey, K.T., ---- (1984) On errors-in-variables for binary regression models. **71**, 19- 25

**Abraham, B.**
---- (1980) Intervention analysis and multiple time series. **67**, 73-78
----, Box, G.E.P. (1979) Bayesian analysis of some outlier problems in time series. **66**, 229-236
----, Ledolter, J. (1984) A note on inverse correlations. **71**, 609-614

**Abrahamse, A.P.J.**
----, Louter, A.S. (1971) On a new test for autocorrelation in least squares regression. **58**, 53- 60

**Ackerson, L.M.**
Jones, R.H., ---- (1990) Serial correlation in unequally spaced longitudinal data. **77**, 721-731

**Adhikary, A.K.**
Chaudhuri, A., ---- (1983) On the efficiency of Midzuno and Sen's strategy relative to several ratio-type estimators under a particular model. **70**, 689-693

**Adke, S.R.**
----, Dharmadhikari, S.R. (1980) The maximum likelihood estimation of coefficient of diffusion in a birth and diffusion process. **67**, 571-576

**Adler, R.J.**
---- (1977) A spectral moment estimation problem in two dimensions. **64**, 367-373

**Afonja, B.**
---- (1972) Mimimal sufficient statistics for variance components for a general class of designs. **59**, 295-302

**Afsarinejad, K.**
---- (1983) Balanced repeated measurements designs. **70**, 199-204

**Agrawal, H.L.**
----, Prasad, J. (1982) Some methods of construction of balanced incomplete block designs with nested rows and columns. **69**, 481-483

**Agrawal, M.C.**
----, Jain, N. (1989) A new predictive product estimator. **76**, 822-823

**Ahn, S.K.**
---- (1988) Distribution for residual autocovariances in multivariate autoregressive models with structured parametrization. **75**, 590-593

**Ahsanullah, M.**
---- (1971) On the estimation of means in a bivariate normal distribution with equal marginal variances. **58**, 230-233

**Ahtola, J.**
----, Tiao, G.C. (1984) Parameter inference for a nearly nonstationary first-order autoregressive model. **71**, 263-272

**Aitchison, J.**
---- (1975) Goodness of prediction fit. **62**, 547-554
---- (1977) A calibration problem in statistical diagnosis: the system transfer problem. **64**, 461-472
---- (1979) A calibration problem in statistical diagnosis: the clinical amalgamation problem. **66**, 357-366
---- (1983) Principal component analysis of compositional data. **70**, 57- 65
---- (1990) On coherence in parametric density estimation. **77**, 905-908
----, Aitken, C.G.G. (1976) Multivariate binary discrimination by the kernel method. **63**, 413-420
----, Bacon-Shone, J. (1984) Log contrast models for experiments with mixtures. **71**, 323-330
----, Begg, C.B. (1976) Statistical diagnosis when basic cases are not classified with certainty. **63**, 1- 12
----, Bennett, J.A. (1970) Polychotomous quantal response by maximum indicant. **57**, 253-262
----, Ho, C.H. (1989) The multivariate Poisson-log normal distribution. **76**, 643-653
----, Lauder, I.J. (1979) Statistical diagnosis from imprecise data. **66**, 475-483
----, Shen, S.M. (1980) Logistic-normal distributions: some properties and uses. **67**, 261-272

**Aitken, C.G.G.**
Aitchison, J., ---- (1976) Multivariate binary discrimination by the kernel method. **63**, 413-420

**Aitkin, M.**
Hinde, J., ---- (1987) Canonical likelihoods: a new likelihood treatment of nuisance parameters. **74**, 45- 58

**Akaike, H.**
---- (1973) Maximum likelihood identification of Gaussian autoregressive moving average models. **60**, 255-265
---- (1978) A new look at the Bayes procedure. **65**, 53- 59
---- (1979) A Bayesian extension of the minimum AIC procedure of autoregressive model fitting. **66**, 237-242

**Akeda, Y.**
----, Hori, M. (1976) On random sequential packing in two and three dimensions. **63**, 361-366

**Akman, V.E.**
Raftery, A.E., ---- (1986) Bayesian analysis of a Poisson process with a change-point. **73**, 85- 89

**Alam, K.**
Ramey, J.T., ---- (1979) A sequential procedure for selecting the most probable multinomial event. **66**, 171-173

**Albert, A.**
----, Anderson, J.A. (1984) On the existence of maximum likelihood estimates in logistic regression models. **71**, 1- 10

**Alff-Steinberger, C.**
Bailey, N.T.J., ---- (1970) Improvements in the estimation of the latent and infectious periods of a contagious disease. **57**, 141-153

**Al-Harbey, A.A.**
El-Sayyad, G.M., Samiuddin, M., ---- (1989) On parametric density estimation. **76**, 343-348

**Alho, J.M.**
---- (1990) Adjusting for non-response bias using logistic regression. **77**, 617-624

**Ali, M.M.**
---- (1977) Analysis of autoregressive-moving average models: estimation and prediction (correction **65**, 677). **64**, 535-545
---- (1979) Analysis of stationary spatial-temporal processes: estimation and prediction. **66**, 513-518
---- (1984) An approximation to the null distribution and power of the Durbin-Watson statistic. **71**, 253-561
Tiao, G.C., ---- (1971) Analysis of correlated random effects: linear model with two random components. **58**, 37- 51

**Altavela, M.M.**
Wood, C.L., ---- (1978) Large-sample results for Kolmogorov-Smirnov statistics for discrete distributions. **65**, 235-239

**Altham, P.M.E.**
---- (1971) The analysis of matched proportions. **58**, 561-576

**Altham, P.M.E.**
---- (1971) Exact Bayesian analysis of an intraclass 2×2 table. **58**, 679-680
---- (1976) Discrete variable analysis for individuals grouped into families. **63**, 263-269
Tavaré, S., ---- (1983) Serial dependence of observations leading to contingency tables and corrections to chi-squared statistics. **70**, 139-144

**Altman, D.G.**
----, Andersen, P.K. (1986) A note on the uncertainty of a survival probability estimated from Cox's regression model. **73**, 722-724

**Amaral, M.A.**
—, Dunsmore, I.R. (1980) Optimal estimates of predictive distributions. **67**, 685-689
**Amari, S-I.**
— (1982) Geometrical theory of asymptotic ancillarity and conditional inference (correction **70**, 303). **69**, 1- 17
Kumon, M., — (1984) Estimation of a structural parameter in the presence of a large number of nuisance parameters. **71**, 445-459
**Amemiya, Y.**
—, Anderson, T.W., Lewis, P.A.W. (1990) Percentage points for a test of rank in multivariate components of variance. **77**, 637-641
**Amos, D.E.**
—, Pearson, E.S. (1970) Corrections and additions to a table of the percentage points of the variance ratio F. **57**, 211-212
**Andersen, P.K.**
Altman, D.G., — (1986) A note on the uncertainty of a survival probability estimated from Cox's regression model. **73**, 722-724
**Anderson, D.**
—, Watson, R. (1980) On the spread of a disease with gamma distributed latent and infectious periods. **67**, 191-198
**Anderson, J.A.**
— (1972) Separate sample logistic discrimination. **59**, 19- 35
— (1975) Quadratic logistic discrimination. **62**, 149-154
— (1979) Multivariate logistic compounds. **66**, 17- 26
Albert, A., — (1984) On the existence of maximum likelihood estimates in logistic regression models. **71**, 1- 10
—, Blair, V. (1982) Penalized maximum likelihood estimation in logistic regression and discrimination. **69**, 123-136
**Anderson, O.D.**
— (1975) A note on differencing autoregressive moving average $(p,q)$ processes. **62**, 521-523
— (1975) The recursive nature of the stationarity and invertibility restraints on the parameters of mixed autoregressive-moving average processes. **62**, 704-706
— (1975) Bounding sums for the autocorrelations of moving average processes. **62**, 706-707
— (1976) On the inverse of the autocovariance matrix for a general moving average process. **63**, 391-394
— (1976) On two convex autocorrelation regions for moving average processes. **63**, 681-683
De Gooijer, J.G., — (1985) Moments of the sampled space-time autocovariance and autocorrelation function (correction **74**, 667). **72**, 689-693
**Anderson, R.D.**
Gilmour, A.R., —, Rae, A.L. (1985) The analysis of binomial data by a generalized linear mixed model. **72**, 593-599
**Anderson, T.W.**
Amemiya, Y., —, Lewis, P.A.W. (1990) Percentage points for a test of rank in multivariate components of variance. **77**, 637-641
—, Stephens, M.A. (1972) Tests for randomness of directions against equatorial and bimodal alternatives. **59**, 613-621
**Andrews, D.F.**
— (1971) Significance tests based on residuals. **58**, 139-148
— (1971) A note on the selection of data transformations. **58**, 249-254
— (1971) Sequentially designed experiments for screening out bad models with $F$ tests. **58**, 427-432
—, Herzberg, A.M. (1973) A simple method for constructing exact tests for sequentially designed experiments. **60**, 489-497
**Andrews, R.L.**
—, Arnold, J.C., Krutchkoff, R.G. (1972) Shrinkage of the posterior mean in the normal case. **59**, 693-695
**Anis, A.A.**
—, Lloyd, E.H. (1976) The expected value of the adjusted rescaled Hurst range of independent normal summands. **63**, 111-116
**Anscombe, F.J.**
—, Glynn, W.J. (1983) Distribution of the kurtosis statistic $b_2$ for normal samples. **70**, 227-234
**Ansley, C.F.**
— (1979) An algorithm for the exact likelihood of a mixed autoregressive-moving average process. **66**, 59- 65
—, Kohn, R. (1982) A geometrical derivation of the fixed interval smoothing algorithm. **69**, 486-487
—, Kohn, R. (1983) Exact likelihood of vector autoregressive-moving average process with missing or aggregated data. **70**, 275-278
—, Kohn, R. (1985) On the rate of convergence of the innovation representation of a moving average process. **72**, 325-330
—, Kohn, R. (1986) Prediction mean squared error for state space models with estimated parameters. **73**, 467-473
—, Kohn, R. (1987) Efficient generalized cross-validation for state space models. **74**, 139-148
—, Newbold, P. (1979) On the finite sample distribution of residual autocorrelations in autoregressive-moving average models. **66**, 547-553
Kohn, R., — (1983) Fixed interval estimation in state space models when some of the data are missing or aggregated. **70**, 683-688
Kohn, R., — (1984) A note on Kalman filtering for the seasonal moving average model. **71**, 648-650
Kohn, R., — (1985) Efficient estimation and prediction in time series regression models. **72**, 694-697
Kohn, R., — (1986) Fast filtering for seasonal moving average models. **73**, 522-524
Kohn, R., — (1987) Signal extraction for finite nonstationary time series. **74**, 411-421
Kohn, R., — (1989) A fast algorithm for signal extraction, influence and cross-validation in state space models. **76**, 65- 79

Subscription details for Biometrika may be obtained from the SUBSCRIPTION SECRETARY, BIOMETRIKA OFFICE, UNIVERSITY COLLEGE, GOWER STREET, LONDON, WC1E 6BT.

Subscribers who buy Biometrika for their own and not for general use may apply to the Secretary to be registered as Personal Subscribers, for whom a special subscription rate applies.

Members of the Institute of Mathematical Statistics and the Bernoulli Society may also subscribe to Biometrika through these organisations at special rates.

---

Biometrika is primarily a journal of statistics in which emphasis is placed on papers containing original theoretical contributions of direct or potential value in applications. From time to time, papers in bordering fields are published. A volume containing over 700 pages will be published annually in four numbers, issued in March, June, September and December.

Biometrika is published by the Biometrika Trust, Biometrika Office, University College, London. The journal was founded by W. F. R. Weldon, Francis Galton and Karl Pearson. It was edited by W. F. R. Welson, Karl Pearson and C. B. Davenport (1901–1905), by Karl Pearson (1906–1936), E. S. Pearson (1936–1966) and D. R. Cox (1967–1991).
